Mr Somerville
Ms Thornton (PT)

These are all the subjects in our Faculty;

- art & design
- design & manufacture
- graphic communication
- photography
- practical woodwork

"In Art, Design & Technology you get to do a lot of hands on work as part of your classes." *S1 pupil*

"It's about using your imagination, developing many new skills that will help you...."- *Kiren, S5.*

"I enjoy this faculty- it's fun, bright and cheerful. Also you can be creative and be inspired too *William, S2.*

The best thing about our faculty is our pupils!

We asked our pupils 'what do our P7s need to know about Art, Design & Technology?' and here's what they said...

"When I was up for my visits I was surprised at how much equipment there was." *Calum, S1*

"...teachers that are good to get along with and are always there to help and support you"- *Kelsey, S5.*

"The teachers are so enthusiastic and it creates a good vibe"- *Emma, S3.*

"I learned a large amount of skills that are not only really fun to do but have been really big influences for me moving on to art school." - *Max, S6.*

"I'd say the Art, Design & Technology departments are amazing! The teachers are also really nice to be around. I enjoyed being able to take my work in my own path and interpret things in my own way. It's nice not being super restricted with your work and being able have some fun with it." *Rachel, S2.*
